TAKEAWAYS

- **Revenue** -- \$751.1 million, up 13.4% year over year, marking the fastest year-over-year quarterly growth as a public company.
- **Product Revenue** -- \$653.3 million, reaching an all-time high, with sequential and year-over-year gains.
- **Service Revenue** -- \$61.9 million, up 15.6% year over year.
- **Gross Margin** -- 31.5%, increasing approximately 280 basis points year over year.
- **Product Margin** -- 35.3%, up 22 basis points over the comparable period.
- **Services Margin** -- 18%, an increase of 13 percentage points year over year, and in double-digit territory for four consecutive quarters.
- **Operating Income** -- \$129.7 million, up from \$13.2 million, with the operating margin climbing to 17.3%, an increase of more than 1,300 basis points.
- **Adjusted EBITDA** -- \$143 million, up from \$25.2 million, expanding the EBITDA margin by more than 1,100 basis points to nearly 19%.
- **Non-GAAP Diluted EPS** -- \$0.44 versus \$0.03 a year ago.
- **Positive Cash Flow from Operations** -- \$73.6 million, with this quarter marking the first Q1 operating cash inflow in company history.

x
Memorial Day Sale

- **Balance Sheet – Cash** -- \$2.52 billion in total cash at quarter end.
- **2026 Revenue Guidance Raised** -- Now \$3.4 billion to \$3.8 billion, previously guided \$3.1 billion to \$3.3 billion; midpoint implies 80% year-over-year growth.
- **Non-GAAP Gross Margin Guidance (2026)** -- Raised to approximately 34%, a roughly 4-point improvement versus 2025, and 2 points above prior outlook.
- **Non-GAAP Operating Income Guidance** -- \$600 million to \$750 million for the year.
- **Non-GAAP Diluted EPS Guidance** -- \$1.85 to \$2.25 for 2026.
- **Continuous Capacity Expansion** -- The company now adds manufacturing capacity in “hundreds of megawatts a quarter” as demand requires, rather than prior episodic increases.
- **Manufacturing Footprint** -- Current facilities support up to 5 gigawatts of annual product output, with ability to expand further as needed.
- **Oracle Project Jupiter Win** -- Bloom Energy named sole power provider for Oracle’s 2.45 gigawatt grid-independent AI campus in New Mexico, replacing previously planned turbines and diesel generators entirely with Bloom Energy Servers.
- **Backlog Composition** -- Over half of the current data center backlog attributed to non-Oracle customers, including other hyperscalers, neo-clouds, and colocation providers.
- **Service Attach Rate** -- CEO Sridhar stated, “Mark, thank you. And look, I think it's important because some people may be coming in new into the story, we have a 100% attach rate between our product sales and our service. That's the first place to start. There is not a single deal that we do without an attach rate to our service. Even with the data center opportunities, on average, it's 10 to 15 years,

Memorial Day Sale

somewhere in that range.”

- **Order Constraints** -- “today, we are not order constrained and not capacity constrained. The pace of our revenue growth is decided by how fast our customers can build their greenfield sites, not how fast we can power them.”
- **Install Innovation** -- The company reports “an order of magnitude reduction” in field installation time through skid-based solutions, supporting faster customer ramp-up.

SUMMARY

Bloom Energy (BE (/quote/nyse/be/) 1.75%) delivered record first-quarter revenue, profitability, and operating cash flow, with management attributing ongoing expansion to demand from AI-related data center projects. Guidance revisions signal higher expectations for revenue, gross margin, operating income, and EPS, indicating increased business velocity and manufacturing scalability. Oracle’s decision to deploy Bloom Energy’s technology exclusively at Project Jupiter positions the company as a preferred supplier for large-scale, grid-independent AI campus power, while accelerating capacity additions and a robust service contract portfolio reinforce growth potential.

x
Memorial Day Sale

- Management specified that more than half of the data center backlog is not from Oracle, but from other major cloud and colocation customers.
- Continuous capacity increases were presented as a strategic shift, replacing past episodic additions, and reflecting confidence in long-term AI-driven demand.
- Bloom Energy’s modular systems and master service agreements were described as offering flexibility for customer site shifts, with geography no longer a limiting factor.

- Skid-based installation solutions have notably reduced field build time, enabling rapid ramp-up and delivery on tight customer deadlines in the AI sector.
- CEO Sridhar emphasized that service contracts maintain a 100% attach rate to product sales, and typically span a decade or longer, contributing to future annuity revenue streams.

INDUSTRY GLOSSARY

- **Hyperscaler:** A company that runs massive-scale data centers for cloud and AI applications, such as Amazon Web Services, Google Cloud, or Microsoft Azure.
- **Colocation Provider:** A business offering third-party data center space and infrastructure for multiple customers' hardware deployments.
- **Copy Exact Model:** Manufacturing approach where each new facility precisely replicates an existing operational model to accelerate expansion and ensure consistency.
- **Microgrid:** Localized, self-sufficient power system capable of operating independently from the traditional electric grid.
- **AI Factory:** Large-scale, purpose-built data center for artificial intelligence workloads, often requiring considerable on-site power and specialized infrastructure.

Full Conference Call Transcript

Michael Tierney: Thank you, and good afternoon, everybody. Thank you for joining us for Bloom Energy's First Quarter 2026 Earnings Call. To supplement this conference call, we furnished our first quarter 2026 earnings press release and supplemental financial information with the SEC on Form 8-K and have posted these materials, which we will reference throughout this call to our Investor Relations

website. During this conference call, both in our prepared remarks and in answers to your questions, we may make forward-looking statements that represent our expectations regarding future events and our future financial performance. These include statements about the company's business results, products, technology, customers, new markets, strategy, financial and competitive position, investments, liquidity and full year outlook for 2026.

These statements, which relate to matters including time to both power and market with standard for on-site power cost efficiency, capacity expansion, innovation, affordability and community acceptance as we look to keep pace with the rapid evolution of our markets are predictions based upon our expectations, estimates and assumptions. However, as these statements deal with future events, they are subject to numerous known and unknown risks and uncertainties, as discussed in detail in our documents filed with the SEC, including our most recently filed Forms 10-K and 10-Q. We assume no obligation to revise any forward-looking statements made on today's call.

During this call and in our first quarter 2026 earnings press release and supplemental financial information, we refer to GAAP and non-GAAP financial measures. The non-GAAP financial measures are not prepared in accordance with U.S. generally accepted accounting principles and are in addition to and not a substitute for or superior to measures of financial performance prepared in accordance with GAAP. A reconciliation between the GAAP and non-GAAP financial measures is included in these materials, which are available on our Investor Relations website. Joining me today are K.R. Sridhar, Founder, Chairman and Chief Executive Officer; and Simon Edwards, our Chief Financial Officer.

K.R. will begin with an overview of our progress, and then Simon will review financial highlights for the quarter. After our prepared remarks, we will have time to take your questions. I now turn the call over to K.R.
